

## Endorsement of Collaboration

AEH Zentrum fuer Arbeitsmedizin, Ergonomie und Hygiene AG, Switzerland supported the development process of the two VONO mattresses ErgoBed800 and ErgoBed1200 including several ergonomic tests.

The Mattresses were improved in several steps between January and June 2011 and now passed ergonomic tests and therefore meet ergonomic requirements.

In summary the products have very good results referring to the aspects firmness and durability. The mattresses support the natural shapes and postures of users' spines in a proper way, allow unconstrained moving and changing of sleeping position and therefore help users to get good quality of sleep.
